Call for Papers

Seventh International Conference on

Modelling Techniques and Tools for Computer Performance Evaluation

May 4 - May 6, 1994

Vienna, Austria

PERFORMANCE EVALUATION, RELIABILITY, and PERFORMABILITY are key factors in the development and improvement of computer systems and computer networks. The conference will focus on NEW TECHNIQUES and the EXTENSION OF EXISTING TECHNIQUES for performance and reliability analysis. Furthermore TOOLS to support performance and reliability modelling and measurement in all kinds of applications and environments will be included. The presented techniques and tools should be of general applicability, which would exclude papers with purely theoretical contents. CASE STUDIES of real systems are especially welcome, if they are of general interest.

Important deadlines:

* October 8, 1993	papers (5 copies, max 20 pages 1.5 spaced, including figures and tables are to be sent to the programme chair)
* October 8, 1993	tutorial proposals (one page to be submitted to the tutorial chair; e-mail preferred)
* December 1, 1993	tool presentations (max 2 pages to be sent to the programme chair; e-mail preferred)
* January 3, 1994	author notification of acceptance or rejection
* February 8, 1994	camera ready copy

The proceedings will be most probably published in the Springer Verlag Series "Lecture Notes in Computer Science".
