This is an unapproved and unpublished IEEE Standards Draft, subject to change. The publication, distribution, or copying of this draft, as well as all derivative works based on this draft, is expressly prohibited except as set forth below.

Permission is hereby granted for IEEE Standards Committee participants to reproduce this document for purposes of IEEE standardization activities only, and subject to the restrictions contained herein.

Permission is hereby also granted for member bodies and technical committees of ISO and IEC to reproduce this document for purposes of developing a national position, subject to the restrictions contained herein.

Permission is hereby also granted to the preceding entities to make limited copies of this document in an electronic form only for the stated activities.

The following restrictions apply to reproducing or transmitting the document in any form: 1) all copies or portions thereof must identify the document's IEEE project number and draft number, and must be accompanied by this entire notice in a prominent location; 2) no portion of this document may be redistributed in any modified or abridged form without the prior approval of the IEEE Standards Department.

Other entities seeking permission to reproduce this document, or any portion thereof, for standardization or other activities, must contact the IEEE Standards Department for the appropriate license.

Use of information contained in this unapproved draft is at your own risk.

Section 5: Revisions to User Portability Utilities Option

5.9 du — Estimate file usage

⇒ **5.9.2 du Description.** *Add a new sentence in the first paragraph, following the sentence beginning with* ‘The du utility, by default ...’’

When a symbolic link is encountered in the file hierarchy, du shall count and write the name and size of the symbolic link itself (rather than the file referenced by the link) and shall continue with the other files in the directory containing the link, not attempting to follow the link to another portion of the file hierarchy.
