All rights reserved as an unpublished work.

This is an unapproved and unpublished IEEE Standards Draft, subject to change. The publication, distribution, or copying of this draft, as well as all derivative works based on this draft, is expressly prohibited except as set forth below.

Permission is hereby granted for IEEE Standards Committee participants to reproduce this document for purposes of IEEE standardization activities only, and subject to the restrictions contained herein.

Permission is hereby also granted for member bodies and technical committees of ISO and IEC to reproduce this document for purposes of developing a national position, subject to the restrictions contained herein.

Permission is hereby also granted to the preceding entities to make limited copies of this document in an electronic form only for the stated activities.

The following restrictions apply to reproducing or transmitting the document in any form: 1) all copies or portions thereof must identify the document's IEEE project number and draft number, and must be accompanied by this entire notice in a prominent location; 2) no portion of this document may be redistributed in any modified or abridged form without the prior approval of the IEEE Standards Department.

Other entities seeking permission to reproduce this document, or any portion thereof, for standardization or other activities, must contact the IEEE Standards Department for the appropriate license.

Use of information contained in this unapproved draft is at your own risk.

E.6.3 `strip` — Remove unnecessary information from executable files

E.7 Language-Independent System Services

Editor's Note: The text of the Rationale for this section has been temporarily located in Section 7, adjacent to the text it is explaining. The text will return to this annex after the completion of balloting.

E.7.1 Shell Command Interface

E.7.2 Access Environment Variables

E.7.3 Regular Expression Matching

E.7.4 Pattern Matching

E.7.5 Command Option Parsing

E.7.6 Generate Pathnames Matching a Pattern

E.7.7 Perform Word Expansions

E.7.8 Get POSIX Configurable Variables

E.7.9 Locale Control

E.8 C Language Development Utilities Option

Editor's Note: The text of the Rationale for this section has been temporarily located in Annex A, adjacent to the text it is explaining. The text will return to this annex after the completion of balloting.

This is the second of the optional utility environments.

An implementation must provide all three of these utilities to claim conformance to this section.

See section **E.4** for a discussion of utilities excluded from this group.

444 ### E.8.1 `c89` — Compile Standard C programs

445 ### E.8.2 `lex` — Generate programs for lexical tasks

446 ### E.8.3 `yacc` — Yet another compiler compiler

447 ## E.9 C Language Bindings Option

448 *Editor's Note: The text of the Rationale for this section has been temporarily*
449 *located in Annex B, adjacent to the text it is explaining. The text will return to this*
450 *annex after the completion of balloting.*

451 ### E.9.1 C Language Definitions

452 ### E.9.2 C Numerical Limits

453 ### E.9.3 C Binding for Shell Command Interface

454 ### E.9.4 C Binding for Access Environment Variables

455 ### E.9.5 C Binding for Regular Expression Matching

456 ### E.9.6 C Binding for Match Filename or Pathname

457 ### E.9.7 C Binding for Command Option Parsing

458 ### E.9.8 C Binding for Generate Pathnames Matching a Pattern

459 ### E.9.9 C Binding for Perform Word Expansions

460 ### E.9.10 C Binding for Get POSIX Configurable Variables
